

Fetal Pig Dissection Commitment Contract Logan Biology

1. I will treat the fetal pig respectfully and honor it throughout the dissection.
2. I will commit to at least 4 hours of lab dissection work each week.
3. I will use the dissection as a learning exploration not as a quick unit earner.
4. I will locate and practice the 200 fetal pig structures and their functions.
5. I will commit to attending the dissection seminars or the makeup seminars.
6. I will complete and hand in 9 dissection labs worth one unit each.
7. I will read chapters 35-38 to prepare for the dissection seminars.
8. I will complete the chapter 35-38 review packets worth one unit each.
9. I will take the fetal pig practical exam either in writing or orally.
10. I will work well with my partners to successfully complete the 9 dissections.
11. I will make connections to human anatomy and work to tell the *Story of Life*.
12. I will practice safe laboratory skills and clean up after myself.

Dissection Seminars: Monday & Wednesday from 8:45-10:45.

Make-ups: Tuesday & Thursday from 12:30-2:30.

The room will be open all day for more practice or help.

No food or drink will be allowed during the fetal pig dissection.

Any ideas or variations are welcome! Please see Mr. Logan if you would like to discuss different/alternative/additional methods to this plan for dissecting the fetal pig.

I _____ have read and agree to abide by the above and any additional printed instructions provided by Mr. Logan. I further agree to follow all written and verbal instructions given in class. I agree that *showing up* willing and prepared to work will account for 85% of my success throughout the fetal pig dissection.
